

АЕТИШЕ СОФИА

SOFIA AIRPORT

Located in the very heart of the Balkans, crossing point of four European transport corridors, Sofia Airport has a network of 60 direct air routes. It offers flexible solutions for major airlines, budget carriers, tourist charters, business aviation and freight operators. Positively impacted by the Bulgaria's regular membership in the EU, the liberalised aviation market access and the modernized infrastructure, Sofia Airport traffic marked a record growth during the last five years. This made possible to recover the investments without raising the airport charges which remain among the lowest in the region for many years.
