SUSTAINABLE TOURISM

some of the principles that define our portfolio of sustainability;

We care about the materials used in our tours

The raw material we use come from not more than 10 km radius of each destination

We employed labor from the communities surrounding the destinations we visit.

We implement internal management policies seeking to minimize the ecological impact in destinations.

We carefully research the communities we visit in order to as faithfully as possible represent their culture and customs.

We support organizations working for the good of the communities we visit.
